

Monthly Air Pollution Control Program Summary Report

Concerns Received or Investigated Between August 16, 2024 and September 15, 2024

Concerns Received During Report Period

	Total
Total	135
Asbestos	10
Fugitive Particulate Matter	15
Hazardous Air Pollutant Release	1
Odor	60
Open Burning	31
Other	16
Particulates	2

Number of Notices of Violation (NOV) Issued: 0

Number of Referral Notices of Violation (RNOV) Issued: 0

Number of Letters of Warning (LOW) Issued: 0

Concerns Investigated During Report Period

	Total
Total	129
Concerns Received Before Report Period	9
Concerns Received During Report Period	120

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern, therefore the totals listed here may not reflect the total number of concerns received during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Monthly Air Pollution Control Program Detail Report

Concerns Received or Investigated Between August 16, 2024 and September 15, 2024

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58692	7/31/2024	9/9/2024	Unknown Name	Fugitive Particulate Matter Open Burning	Sparta /Christian	SWRO	CR	Letter UF
Concerned Party:		Anonymous						
Concern Info:		Anonymous caller, states that he bought his business a couple weeks ago and the person or individual who is across the street has a fire burning perpetually (he believes commercial byproducts) day and night. He keeps the fire going day and night. There is also fugitive particles (ash) coming onto his business and he and his employees feel sick once coming to work everyday. Caller called back 8-1-24 and stated that his co-worker had witnessed debris being trucked in and added to the burn pile.						
Conclusions:		SharePoint #10460 An Unsatisfactory Finding is being issued for failure to meet the setback distance requirement of 200 yards.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58779	8/12/2024	8/28/2024	Unknown	Open Burning	/Cedar	SWRO	BD	Letter
Concerned Party:		Anonymous						
Concern Info:		My neighbor to the west of my house has just land. There is no house. It has a gate and has two huge burn/junk piles. Trash/junk has been burned there regularly for the last couple years that we know of. The smoke has been going onto our property a lot lately and the smoke is bothering us a lot. I want to make sure the property owner is not burning toxic chemicals and has a permit to burn such large amounts trash and junk. I have seen a large dump truck go in and out of the property a few times. The piles can be seen from google maps of the area. The address is 19065 E 1000 Rd, Stockton, MO 65785						
Conclusions:		SharePoint #10598. No violations of 10 CSR 10-6.045 Open Burning Requirements were directly observed during the investigation. If additional concerns are received, they will be routed through Solid Waste Management Program for the open dumping of potentially regulated waste on site.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58843	8/14/2024	8/19/2024	St. Joseph Sanitary Landfill	Odor	St. Joseph /Buchanan	KCRO	CK	Site Visit
Concerned Party:		Suzi Hanway						
Concern Info:		CP stated that the odor from St. Joseph Landfill is very strong and that they cannot spend time outside due to the odor.						
Conclusions:		This odor concern could not be verified during the investigation. Landfill representative, thought that this odor may of been from transferring regulatory chromium waste from a tanning factory into a new lined cell. All of this work has been completed and this odor inducing activity is completed.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58860	8/16/2024	8/16/2024	Susan Harris	Other	St. Joseph /Buchanan	KCRO	MC	Other
Concerned Party:		Richard L Hadsall						
Concern Info:		Via webform - Inquiry/Question - Submitted at 11:57 am Friday, August 16, 2024 :						
		There is a "vacant" house in probate court located in our neighborhood that is being prepped for sale. The house with peeling paint exposing asbestos siding and the unattached building are highly suspect for exposed asbestos and are a concern to the neighborhood. What are the proper methods for preparing surfaces known to contain asbestos? It is not owner occupied and is there a requirement for asbestos testing before and after the paint prep and application? Is this something that a certified abatement contractor must do? There is a concern that once the asbestos fibers are airborne, they can drift across properties exposing others.						
Conclusions:		This house appears to meet the residential building exemption for asbestos. No on site visit was conducted. I also informed the City of St. Joseph of the concern in case there were any local code issues that needed to be addressed.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58868	8/19/2024		IsoNova Technologies	Odor	/Lawrence			
Concerned Party:		Willard Bontrigger						
Concern Info:		Willard Bontrigger called to report that IsoNova Technologies released significant odors over the weekend. Bontrigger is aware that IsoNova Technologies has an RTO to reduce odors, but he suspects that the facility is not using the RTO outside of business hours. Bontrigger says the smell is the worst on the weekends and overnight. Bontrigger lives directly north of IsoNova Technologies.						
Conclusions:		SharePoint #10694						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58876	8/16/2024	8/16/2024	Unknown	Open Burning	Dixon /Maries	SERO	JE	Phone Conversation
Concerned Party:		Raymond Curtis						
Concern Info:		Neighbor on same property burned some material after they were advised not to. There appeared to be "chemical bottles" and potentially a small camping butane bottle, along with other material. The individual is no longer lives on the property.						
Conclusions:		Minimal amounts of open burning occurred under a one time occurrence. Open burning information was provided to the property owner.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58887	8/20/2024	8/29/2024	Kent Longley	Scrap Tire Hauler Odor	Cassville /Barry	SWRO	GE	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		Caller says that they overheard conversation that Kent Longley, owner of MARCK industries stating that they had buried a pile of over 5,000 tires along with a school bus full of used motor oil and several vehicles on a property that used to be an old salvage yard.						
Conclusions:		SharePoint #10726. No environmental violations were noted during the investigation.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58893	8/21/2024	8/29/2024	Quarry next to Pinewood Village	Fugitive Particulate Matter Open Dumps:	/Taney	SWRO	BD	Report
Concerned Party:		Jimmy Kisner						
Concern Info:		Crushing rocks and covered neighborhood in dust. Junkyard too, garbage, broken cars, abandoned construction equipment everywhere. No warnings are given before blasts. Several complaints in the neighborhood. Concerned party is worried that they may be operating outside of what their permits allow.						
Conclusions:		SharePoint #10734. A full compliance inspection will be conducted to determine compliance with the requirements set by the facility's permit as well as compliance with 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58897	8/20/2024	8/23/2024	Our Last Resort LLC	Asbestos	Cole Camp /Benton	KCRO	CK	Site Visit
Concerned Party:		Jeff						
Concern Info:		A remodel is currently underway at three buildings located at 102 North Maple St, Cole Camp, MO. The three buildings were vacant for around 20 years. The new owners have been remodeling all three buildings and combining them into one bar. There is still about a month of remodeling left. They are removing walls, ceilings, and flooring. They also might be removing concrete.						
Concern Info:		Concerned that the owners did not get an asbestos inspection preformed prior to the renovations and could expose the workers and future customers.						
Conclusions:		The co-owners (Gary Luebbering and Jeff Pope) of Our Last Resort were conducting remodel work. They failed to inspect for the presence of asbestos prior to remodel.						
Conclusions:		An inspection report with Unsatisfactory Findings was issued.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58898	8/21/2024	9/3/2024	Northern Stone County MO. Maintenance Dept.	Open Burning	Galena /Stone	SWRO	BD	Site Visit
Concerned Party:		Danny Harness						
Concern Info:		As written on online form: They burn large trees and brush at night with no fire watch! Sometimes 24 hours a day, the smoke and ash get all over my house and cars! Sometimes it is hard to breathe there is so much smoke!						
Conclusions:		SharePoint #10748						
Conclusions:		No violations are being filed with the department at this time. Stone County is looking into the possibility of acquiring an ACI/ACD that will eliminate the 200 yard setback distance requirement and cut down on any fugitive dust concerns that arise from the burning.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58901	8/22/2024	8/22/2024	Aaron Rentfro	Open Burning	Vandalia /Audrain	NERO	BH	
Concerned Party:		Anonymous						
Concern Info:		Caller states RP is burning vegetation at night and close to residential structures that the RP does not own.						
Conclusions:		No violation. Missouri allows open burning of yard waste that originates and burns on the same premises.						
		We discussed contacting local authorities						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58903	8/22/2024	8/26/2024	Hostetler Quarries	Fugitive Particulate Matter	Buffalo /Dallas	SWRO	CR	Other
Concerned Party:		Colby Davidson						
Concern Info:		CP lives down the road from Hostetler Quarries and states that dust from the quarry is on the roads and their property. Dust is irritating the eyes and lungs of the caller. Caller also states that the facility has a water truck, but that it is rarely utilized. Dust is more bearable during rainy periods, but during the dry weather dust is everywhere. An inspection in 2020 recorded a violation of dust control best management practices.						
Conclusions:		SharePoint #10762						
		No fugitive dust violation observed during the visit.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58912	8/22/2024	8/22/2024	Central Missouri Forest Products sawmill	Open Burning Fugitive	New Bloomfield /Callaway	NERO	DB	Report UF
Concerned Party:		Anonymous						
Concern Info:		Caller reports that a sawmill (Central Missouri Forest Products, LLC) located on County Road 370 near New Bloomfield, has been open burning large piles of scrap cut-off slabs regularly for months. The smoke is consuming the neighborhood, the burning takes place at all hours of the day, and the sawdust is blowing off the property. The burn pile can be seen from the road and is too close to neighboring homes. The facility is registered to William Caleb White, and is located approximately 0.5 miles west of the intersection of Old Highway 54 and County Road 370. The facility is on the south side of the road.						
Conclusions:		UF, observed burning untreated wood from sawmill less than 200 yds from nearby residences. Will issue UF and require a response.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58914	8/22/2024	9/4/2024	Simmons Protein	Odor	Southwest City /McDonald	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		417-762-3271 (Simmons Prepared Foods) Anonymous caller from Southwest City Schools reporting odor from Simmons Protein. States that the odor is making people outside feel ill as they are arriving for school.						
Conclusions:		SharePoint #10752 No violation of 10 CSR 10-6.165 Restriction of Emission of Odors was observed during the investigation. Odors detected off site were very faint, and not at a 7:1 dilution threshold.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58916	8/13/2024	8/19/2024	Keith Tasco	Open Burning Scrap Tire	La Belle /Lewis	NERO	BH	Letter AC
Concerned Party:		Anonymous						
Concern Info:		Email states, "Piles of old tires, also a big burn pile."						
Conclusions:		on-site visit There is a burn pile on property and pile of tires. I left a business card at Keith's building on 7th Street and Central Street asking him to contact me. Sending a contact NERO letter.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58916	8/13/2024	8/19/2024	Keith Tasco	Open Burning Scrap Tire	La Belle /Lewis	NERO	BH	Letter UF
Concerned Party:		Anonymous						
Concern Info:		Email states, "Piles of old tires, also a big burn pile."						
Conclusions:		on-site visit There is a burn pile on property and pile of tires. I left a business card at Keith's building on 7th Street and Central Street asking him to contact me. Sending a contact NERO letter.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58922	8/21/2024	8/22/2024	City of Leadwood	Other	Leadwood /St. Francois	SERO	NW	Site Visit
Concerned Party:		Anonymous						
Concern Info:		CP states: I get head aches and someone is going to get in a car wreck. They do 80 to 90 in a 55 mph to get past the smell. I get head aches. Its at night between 7-10 pm. at least make the cops sit so peo0ple stop bouncing rocks at my widow. Because you cant pass on that highway.						
Conclusions:		No odor concerns were identified.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58928	8/23/2024	8/23/2024	Unknown	Odor	Moberly /Randolph	NERO	DB	Site Visit
Concerned Party:		Carol Smith						
Concern Info:		Online report states: There is a heavy chemical odor in, near Moberly MO. I arrived in north side of town around 11am and smell is still prevalent in each area I have been in .I have put on mask. Thought I should let someone know since is is not dissipating						
Conclusions:		8/23 Steve Boone (DNR) drove through Moberly on the highway and noted no odors at the north end of Moberly. Some odors south/east area of town near a wastewater lagoon. 8/26 I spoke with the complainant by phone. She said she was in the area again today and the odors were gone. She said the odors had been like pesticide and had been strong enough even her husband had been bothered by it. No violation was documented by the investigation.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58937	8/22/2024	8/27/2024	Generational Builders	Open Burning	Jamesport /Daviss	NERO	BH	
Concerned Party:		Anonymous						
Concern Info:		Caller stated that over the last few years she had noticed black smoke coming from the Generational Builders property. Caller stated that when she drives by early in morning for work they are usually burning something that creates a black smoke around 4 am. Caller stated she did not know what was being burned but it is usually a thick, black smoke.						
Conclusions:		on-site visit no violation						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58945	8/28/2024	8/28/2024	Lions Club	Asbestos	Green Castle /Sullivan	NERO	BH	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		Caller reports concern of lion's club building being demolished. Wanted to know if they had completed items necessary for demolition (Asbestos).						
Conclusions:		8/28/24 I called the City of Green Castle to ask if they had completed a demolition notification for the Lions Club building or could direct me to someone that would know. They told me they would ask and call me back. Derrick Fee called me back and informed me that a demolition and asbestos notification had been completed and submitted with the state.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58948	8/20/2024	8/20/2024	Brockmount Apartments	Odor	/St. Charles	SLRO	RA	
Concerned Party:		Dasha						
Concern Info:		We recieved an odor concern from the EPA. The concerned party is reporting toxic paint fumes that she is experincing inside her apartment. Her animals were coughing and she is experiencing a headache and lightheadedness.						
Conclusions:		8/20/24-RLA-I called Dasha and left a voicemail. 8/21/24-RLA- Dasha returned my call and I spoke to her about her concern. I told her that DNR does not regulate indoor air and I gave her the number to St. Charles department of public health.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58949	8/15/2024	8/19/2024	Simpson Materials	Odor	Valley Park /St. Louis	SLRO	RA	
Concerned Party:		Anthony Sebastian Russo						
Concern Info:		Recieved an odor concern from the DNR website. The CP states strong odor of petroleum (asphalt) coming from simpson materials in Vally park smoke and smog. between 7 and 8 am. been happening all summer.						
Conclusions:		Referred concern to St. Louis County Department of Public Health.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58952	8/9/2024	8/16/2024	Precoat Metals	Odor	St. Louis /St. Louis City	SLRO	RB	
Concerned Party:		Natalia						
Concern Info:		Recieved an odor concern from the DNR webpage. The CP states "Hello, today is the second time I have noticed a strong odor in my neighborhood. It smells acrid and bitter and it's unlike any other smell that is familiar such as burning oil, trash or firewood. I cannot pinpoint exactly where it's coming from but it is strong enough to enter the house when all doors and windows are shut. Since it has happened before I decided to make an alert, it is extremely unpleasant. This is a residential area and I do not know of any industrial plants that could have an impact. "						
Conclusions:		<p>8/9/24: I visited the site around 1:30 PM and smelt an odor that was coming from Precoat Metals. I walked in and met the EHS manager Derek Walker. We sat down with the plant manager and I asked if there was any misfire or emissions problems. They stated it was business as usual and no unusual occurrence happened. The fire dept did show up around 7 AM as well and used their gas and radiation detection to found 0 on their monitors. We walked the plant and went outside and I saw zero opacity, but the smell was strong. I had come from a previous inspection so I did not have the nasal ranger. Walker showed me that the furnace was at 1437 degrees and should be above 1400 degrees at all times. He also stated that they have an alert systems when the temperature drops and have not had any alerts. He also stated that the efficiency for the destruction of the VOC's was above 98%. Walker has gotten odor concerns before from neighbors over on 39th st and walked over with a Dräger X-am@ 2500 that detects O2, CO, NO2, SO2 and H2S, and found 0 problems on that street. Although the odor exists, it may not be a violation. As I was driving away I noticed a family walking on the street and asked them about the odor. A man said he smells it almost daily. I gave him my card and told him to call me if he finds the smell to be unbearable.</p> <p>8/16/24: I visited the site with a Nasal Ranger. I conducted an odor test, but found there to be no odor present. I called the EHS manager Derek Walker to let him know the results and emailed the CP again. I did not get a response from the first email I sent the CP. No visible opacity was coming from the facility either.</p> <p>A strong odor was present and was coming from Precoat Metals facility. The odors did not exceed the 7:1 Odor threshold, therefore no violations were found during the inspection.</p>						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58953	8/20/2024	8/20/2024	Unknown	Odor	/St. Louis City	SLRO	SL	
Concerned Party:		Anonymous						
Concern Info:		The cp is describing a burning rubber / noxious chemical smell in the Gravois Park Neighborhood of South St. Louis City, near the intersection of Jefferson and Chippewa						
Conclusions:		<p>8/20/2024 - reviewed the local odor data, and spoke with Cameron Weeks to plan an investigation for the following day</p> <p>8/21/24 - SEL and Cameron Weeks conducted an investigation of the area. During the investigation no odors were noticed. During the investigation, we ran the St Louis City Odor Loop. At Willert Home Products and Midwest Industrial Chemical an odor was noticed outside of both facilities. The odor was mild and sporadic. No violation was noted.</p>

58961	8/23/2024	8/23/2024	Unknown	Odor	/St. Louis City	SLRO	HH	
Concerned Party:		Kate						
Concern Info:		We recieved an odor concern from the DNR website. The CP stated Tonight when I returned home (Mackenzie/ Villanova) around 7:45 pm I noticed a strong, acrid and almost astringent chemical odor. It burned the insides of my nostrils and made them feel inflamed. I asked my neighbor who came outside and smelled it, too. We couldn't tell the source but it seemed to be wafting through the neighborhood. The smell was not present this afternoon when I left home around 2:40 pm. I posted on NextDoor and someone near Gravois and Hampton responded: "I smell it over here...! I had my windows open and it was making my eyes water and my nose run too!" I'm getting ready to undergo fertility treatment to become pregnant and deeply concerned about being exposed to environmental contaminants that could harm my chances or a possible pregnancy.						
Conclusions:		8/23/24-RLA- I looked up the area and the where Mackenzie and Villanova meet is on the border of STL county and STL City. If the source of the odor is west of where the two streets meet then we will need to contact STL County. On 8/23/2024 I emailed Kate that I will be investigating her concern on 8/26/2024, Kate sent me an email stating there is no odor in her location anymore. on 8/26/2024 I visited the concerned area, I did not smell any foul odor.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58976	8/28/2024	8/28/2024	Former Spelman Hospital	Asbestos	Smithville /Clay	KCRO	JS	Report
Concerned Party:		Kristine Bunch						
Concern Info:		CP reports that demolition is occurring without any controls to prevent asbestos dust. I informed the CP that this demolition was reported to the department and was required to do a wet demolition. CP reports that no water is being sprayed during the demolition and dust is leaving the demolition site. I informed the CP that we are sending Jennifer Shimamoto, an air pollution inspector, to the demolition to observe the work that is being conducted. CP identified herself as the publisher for the Smithville News and offered to do an interview with Shimamoto.						
Conclusions:		It was determined that demolition of a house and detached garage at 108 West Main Street were also occurring as part of this project, but they had neither been included in the notification nor had been inspected for asbestos. An inspection was performed, and friable asbestos identified in the house. A wet demolition of the remaining portion of the house was then conducted. No violations were observed regarding demolition of the hospital building itself. A Referral Notice of Violation (RNOV) is being issued to Industrial Salvage & Wrecking Co., Inc. and to 110 Smithville, LLC for 1) failure to include 108 West Main Street in the original Asbestos NESHAP Notification of Demolition and Renovation; 2) failure to inspect 108 West Main Street for asbestos prior to beginning demolition; and 3) failure to remove all regulated asbestos-containing materials prior to activities that would break up the material.

Concerned Party:		Jo Pruitt						
Concern Info:		CP reports that demolition is occurring without any controls to prevent asbestos dust. CP requested to speak with Mike Carroll, KCRO Regional Director. Carroll contacted the CP and discussed the demolition. The department is sending Jennifer Shimamoto, an air pollution inspector, to the demolition to observe the work that is being conducted in response to multiple concerns about this property.						
Conclusions:		It was determined that demolition of a house and detached garage at 108 West Main Street were also occurring as part of this project, but they had neither been included in the notification nor had been inspected for asbestos. An inspection was performed, and friable asbestos identified in the house. A wet demolition of the remaining portion of the house was then conducted. No violations were observed regarding demolition of the hospital building itself. A Referral Notice of Violation (RNOV) is being issued to Industrial Salvage & Wrecking Co., Inc. and to 110 Smithville, LLC for 1) failure to include 108 West Main Street in the original Asbestos NESHAP Notification of Demolition and Renovation; 2) failure to inspect 108 West Main Street for asbestos prior to beginning demolition; and 3) failure to remove all regulated asbestos-containing materials prior to activities that would break up the material.

Concerned Party:		Nicole Watson						
Concern Info:		I am concerned about a repeated manure and/or animal rotting smell that overwhelms our property. We live in Webb City, near Carterville, and I have been told, by multiple people, that the source is a company spreading grease and human waste in this area. I am tolerant of basic fertilizer smells, as I come from a farming background, but the odor is just horrific. I can't imagine this is okay to run off into our waterways! Some days I cannot go outside and be in my yard or garden because it is gag-inducing. Please let me know if there is anything else I can be do to get this practice changed. I'm so proud of Missouri's long history of excellent conservation work, and hate to see businesses abusing our land to make an easy dollar.						
Conclusions:		SharePoint #10889 Not a regulated activity.

59024	9/3/2024	9/10/2024	Teresa Chappell	Open Burning Scrap Tire Open Dumps	Springfield /Greene	SWRO	GE	Communication In Person
Concerned Party:		Jennifer Smith						
Concern Info:		Over the weekend I was contacted by Willard Fire Chief Ken Scott who stated that at the property 3393 N Farm Road 123, Springfield, Missouri they had responded to a fire involving several hundred tires. Chief Scott stated that the tires had been purposely burned and also another burn pile of wire and other plastics were being burned. I have not been onsite but have noted that on past aerial photography in the spring of this year that there do appear to be several tires on the property around the barn and in the barn. Greene County Code Compliance is going to be reaching out to the property owner for other issues on the property including a homeless camp in the barn but since can't address the burning issue as there are not regulations for burning in Greene County.						
Conclusions:		SharePoint #10890. Open burning regulations were reviewed, copy of regulations and technical bulletin was left on-site with Brown. In addition Brown signed the Air Pollution Violation Acknowledgement letter at the conclusion of the investigation.

Concerned Party:		Gary Brown						
Concern Info:		Recieved an dust concern from the EPA Citizen Tip line. The CP states Massive amounts of gravel/concrete dust being put into the air from the expansion of Missouri I-55 from Pevely through Festus and continuing down Highway 67. The companies are making no effort to alleviate the dust storm they are creating by using water wagons or other methods of keeping the dust down. Besides having to breathe this in, it is ruining the paint on vehicles and other painted itmes that may be outside. The worst cases are east of I-55 to prevailing winds, but on still days it is affecting the entire area. We have complained to MODOT about the problem, but as of yet there has been no action taken.						
Conclusions:		8/30/24-RLA- This is the first concern we have had about this dust concern. Myron copied Michael Foppe (MODOT) for his awareness. ON 09/03/2024 about 10:00 AM, I drove on Highway I-55 south, there was construction activities about one mile before exit Pevely but I did not see any dust leaving the construction area that is the same when I arrived at exit Festus. Conducted site investigation. I did not see any dust coming from the construction.

59108	8/28/2024	8/28/2024	Arch Enterprises	Opacity	Mexico /Audrain	NERO	DB	Site Visit
Concerned Party:		City of Mexico, Drew Williford						
Concern Info:		Drew Williford with the City of Mexico reports that smoke is really back at the Arch Enterprises Lakeview site this morning. They have had complaints from neighboring businesses about the smoke.						
Conclusions:		At Arch Drive at about 1330, observed minor smoke 5-10% opacity from the stack at the west large kiln. At Lakeview site at about 1410 found no visible emissions. Discussed with Jim Lightsey. He showed me both sites. He said the Arch Drive site had been running the burn for three weeks and usually it is done after ten days, so something is causing issues and he doesn't know what. He said he expects this will be the last burn at that site. He showed me his camera recordings and I noted that between about 0830-1030 there was significant smoke across a wide area north of the lakeview site. He said he believes opacity occurs when it is humid, but doesn't know why.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59109	8/26/2024	8/28/2024	Arch Enterprises	Odor	Mexico /Audrain	NERO	DB	Site Visit
Concerned Party:		Crystal Jimenez						
Concern Info:		Via email, "PDO contacted the reporting party C. Jimenez. Jimenez stated that odor and smoke have been coming from the old AP Green property (700 Green Blvd. Mexico MO) since July 28. The local police department and the fire department have been notified multiple times. Jimenez stated that she contacted the city department of commerce who reported that Harbison Walker Refractories is operating at the property. Jimenez reported that the ongoing issue has impacted her neighbors health. PDO referred caller to 911 for any immediate health concerns, and public health department for nonimmediate health concerns. PDO referred caller to MoDNR for additional follow up. PDO referred case to EPA ECAD.						
Conclusions:		At Arch Drive at about 1330, observed minor smoke 5-10% opacity from the stack at the west large kiln. At Lakeview site at about 1410 found no visible emissions. Discussed with Jim Lightsey. He showed me both sites. He said the Arch Drive site had been running the burn for three weeks and usually it is done after ten days, so something is causing issues and he doesn't know what. He said he expects this will be the last burn at that site. He showed me his camera recordings and I noted that between about 0830-1030 there was significant smoke across a wide area north of the lakeview site. He said he believes opacity occurs when it is humid, but doesn't know why. 9/10 I called the complainant to discuss the findings of the investigation and she said the smoke was still present last night. I said I would plan to check on the site again.

59115	9/5/2024	9/5/2024	AZZ Galvanizing- St. Louis	Fugitive Particulate Matter Illness or Odor	St. Louis /St. Louis City	SLRO	RA	
Concerned Party:		Wilhelmina Shackleferd						
Concern Info:		Wilhelmina called to complain about AZZ Galvanizing. Her and a few folks on a local council are trying everything to address their concerns with this company. People are unable to sleep at night due to the loud noises coming off of the plant 24/7, and there has been dust that has come off the plant that have covered local school buses, etc. The noise started 2 months ago. Wilhelmina recalls something conversation of 'bags' in relation to the plant and the noise, and I theorized with her that perhaps there were baghouses that were causing noise at the plant. Wilhelmina says she has gotten sick 6 times in the last 6 months since living around this plant. And she has concerns because this plant is next to a low income neighborhood. She lives in the surrounding neighborhood and has environmental health and safety concerns for the local residents. If we had any information about how they can address their sound/health concerns with the plant, she would love the resources. She also would love for someone to go out there and check out the plant to make sure the plant is doing everything correctly. I told her this sounded like an Air Pollution issue and would refer her concern to the APCP team, where they could review the air permit. She said she would also email me more information about the dust issue either tomorrow or in a few days.						
Conclusions:		Concern was referred to St. Louis County Dept of Public Health APCP.

59138	8/15/2024	8/28/2024	Corey Wagner	Open Dumps	Troy /Lincoln	SLRO	SH	
Concerned Party:		Ryan Howell						
Concern Info:		The following was submitted on the Department's online concern webform:						
		"Location of the property is 1290 Sand Run Rd. Troy, Missouri 63379. I have contacted multiple agencies the last few years about a concern with a neighbor of mine operating a dump/burn site as a business along with having people living in camping trailers, dumping waste water on the ground. The property owner is advertising a dump site on Facebook. I believe DNR has already contacted the owner of the property in the past for the same concerns."						
Conclusions:		- 8/28/24 SJH- I spoke with Mr. Wagner on the phone to give him direction as to whether he can haul wood wastes for others to his property. He stated that no one was living on site, but that he was renting out the shop building. Mr. Wagner stated that he planned to turn the area into something of a parking lot. I told him about the handouts left and stated that future concerns on the issue would escalate the matter.						
		I then called Mr. Howell to inform him of our findings and to remind him to continue to call the fire department when noxious fires are lit next door, and to let us know if it happens again. He agreed to keep us informed.						
		Suzanne Lamb will be sending a Compliance Assistance Letter due to the reports from the local fire department.

59141	8/23/2024			Open Burning	Dittmer /Jefferson	SLRO	CW	
Concerned Party:		Kevin Keaton						
Concern Info:		Kevin Keaton called to report that their Neighbor has a pond, has algae and allegedly they septic system is leaking into the pond. Kevin explained that he had called and reported this to us before, said someone was going to visit site and test the water, however I was unable to locate a concern related to this area. I pulled up the area and informed Kevin that as the body of water is not WOTS and is not connected to WOTS, and there is not observations of the creek being impacted (400ft) away, that Missouri DNR would be unable to regulate the concern and that they should contact DHSS, as they are the regulatory authority of single home sepic systems.						
		Kevin went on to explain that there is also a Large burn pile, consisting of various materials including: plastic, furniture, etc. I let Kevin know that Air Pollution Control may be able to regulate the issue, and that I would enter the concern for him.						
Conclusions:		Conducted a site visit and was unable to approach the house due to dogs. I will be writing a compliance assistance letter with open burning fact sheets.

59168	9/13/2024	9/16/2024	Langley's Recycling	Odor	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:		Anonymous						
Concern Info:		Via Webform - Submitted at 3:08 am Friday, September 13, 2024						
		Date of Incident or First Noticed: 03/04/24						
		I live near Langley's Recycling plant. Every day we drive by during the day it smells terrible and hard to breathe . I've been having respiratory issues for a few weeks now . I have no history of such issues whatsoever. I'm concerned Langley's recycling plant is affecting my health. My air purifier constantly shows the air is in the red even after running constantly. I believe a relocation is more than necessary. Can you come check the air quality? I'm afraid they are harming local residents and violating regulations.						
Conclusions:		This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.						
		Kansas City's Air Quality Program (KCAQ) provided an update on 09/24/2024. They have been investigating this matter over the past week but have not detected any odors at the location during this time. KCAQ previously visited this site for open burning complaints, for which they received a warning (08/22/2024). KCAQ spoke with the manager, who confirmed they have not been burning and suggested the odor might be coming from nearby Brush Creek. During the investigation, no strong odor was detected from the creek. KCAQ noticed a few homeless camps in the area, which could potentially be another source of the odor. KCAQ will continue to monitor.

59203	8/22/2024	8/22/2024	Unknown	Odor	/St. Louis City	SLRO	RB	
Concerned Party:		Candice Lewis						
Concern Info:		We recieved an odor concern from the DNR website. The CP states My address is 4033 Bamberger Ave. St. Louis MO 63116. There is a dangerous toxic chemical odor that is in the air yesterday, 8.21.24 and today 8.22.24. It was also detected the week of 8.11.24. These chemicals in the air are debilitating, even with all my windows closed. My symptoms include, swollen air passage in throat making breathing difficult, scratchy/sore throat, burning eyes, headache, stomach ache, nausea and mental disorientation.						
		The odor appears to encompass the entire neighborhood, as it cannot be pinpointed to a singular address.						
Conclusions:		After driving to multiple locations around the neighborhood, I have no signs of odor.

Concern Info:		Recieved an odor concern from the DNR website. The CP states Woke up to chemical smell in throughout neighborhood (2916 Victor, Tower Grove East neighborhood, south St Louis City). Noticed again today (9/11/2024) but was not able to choose that date on the drawdown menu above."						
Conclusions:		I visited onsite and I did not find any odors.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59208	9/11/2024	9/11/2024	Unknown	Odor	/St. Louis City	SLRO	HH	
Concerned Party:	Anonymous							
Concern Info:	Recieved an odor concern from the EPA. The CP states " I have lived in the city of St. Louis for nearly a decade. Every once in a while, we can smell a recurring chemical/petroleum smell and the city becomes hazy. This issue is happening again right now. It can be experienced for many miles around the city. It doesnt't seem safe to breath the air. I know the EPA is aswre of this - please please make it a priority!!"							
Conclusions:	I did not smell any chemical or foul odor during my site investigations.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59209	9/12/2024	9/16/2024	Possibly coming from Sauget, Illinois	Odor	/St. Louis City	SLRO	RB	
Concerned Party:	Anonymous							
Concern Info:	We recieved an anonymous odor concern from the DNR webpage. The CP states "27XX Shenandoah Ave./Fox Park St. Louis City- The air has been thick these past two mornings with an acrid smell, like an electrical fire. Wind has been from the east/southeast around 7-10 mph. My household has been experiencing respiratory effects and headaches.							
	The air was also bad last week on a few days but I didn't write it down."							
Conclusions:	No odor was present during my visit and I was able to talk with people who worked in the area, and they had smelt no odors.

59210	9/12/2024	9/13/2024	FCPWSD #1 - Cobblestone Creek Estates	Minor Wastewater Facility Odor	Washington /Franklin	SLRO	AC	
Concerned Party:	Butler Douglas							
Concern Info:	Bulter Douglas called to report that a very strong odor has been coming from the WWTP FCPWSD #1-Cobblestone Creek Estates. The CP stated that the odor is so strong that it can cause head aches, and that he has tried to contact the facility about the odor but they have yet to respond to him.							
Conclusions:	The MDNR can not issue a violation for odors alone, and unusally odors can be an indicator that a WWTP facility is suffering from a larger mechanical issue. However, no detectiable mechanical issues were found in regards to this facility at the time of this investigation. And accorindg to the facility's operator, the location has not had a serious a issue in the recent past. It is most likely that the facility is operationally sound and within compliance with its operating permit, and that the powerful odor reported by the CP was a result the facility being heavily used at the time. On Monday 09/16/2024 I called the CP and reported the findings of my investigation and suggested that should he again smell this powerful odor that he call the facility's operators as soon as possible so that they may deal with the issue as quickly as they can.

Concerned Party:	Chad Walkup							
Concern Info:	The CP reported that asbestos testing was conducted from dust samples by Triangle Environmental in the CP's business in the week of September 2nd, that came back positive for asbestos. The samples were taken as the result of a prior event that occurred in April 2024, stating that construction materials were discarded from a second story building behind the CPs business that resulted in a white film in the surroundings. The CP referenced that the RP advised the film was not asbestos. The CP has questions on safety concerns and next steps.							
Conclusions:	No violations noted at time of the investigation.

Concerned Party:		Eric Silkwood						
Concern Info:		CP reached out about lead dust contamination from a transfer/holding site for contaminated soil. The facility receives numerous dumptrucks containing contaminated soil and dumps it into bins on the property, where it is allegedly stored before being transported to Bonne Terre. The bins for the soil are overflowing and it allows dust plumes of potentially contaminated soil to carry off property. The CP mentioned the close proximity of Big River and is worried about lead runoff into the river.						
Conclusions:		A site visit was conducted. A violation of 10 CSR 10-6.170 was noted, and a Letter of Warning will be issued to the responsible party.

59281	8/14/2024	8/20/2024	Dennis Oser/Missouri Better Bean	Hazardous Waste Generators Drinking Water Odor	Bunceton /Cooper	NERO	JB	Other
Concerned Party:		City of Bunceton						
Concern Info:		Caller states that they are concerned about potential contamination at a former Missouri Better Bean site located at the intersection of Elm and 2nd Streets in Bunceton, Missouri. According to the caller, the site was cleaned up approximately three years ago, but alleges that the remaining biodiesel manufacturing related chemicals stored onsite had been dumped onto the ground. The caller stated that vegetation has not grown at the site since the cleanup, and the person hired to conduct the cleanup died from cancer within a year of cleaning up the site. The caller is primarily concerned with potential groundwater contamination and contamination of a City of Bunceton drinking water well located less than 200 feet north of the site, but is also concerned about periodic chemical-like odors coming from the site and the potential harm to human health from the odors and potential exposure to site contamination. When asked about conditions of the well water, the caller told me that they had not detected any contaminants during testing and had not noted any issues with the well.						
Conclusions:		Administratively Closed 9/20/2024

Concern Info:		The concerns are still ongoing. Those concerns are a very unpleasant nasty smell that is blowing from the East right to my apartment windows and stops me from enjoying an open window. That smell also seems to cause some side effects like eye irritation and sickness to my stomach. Now the only thing that East of me that would cause that smell would be the waste pond I have complained about. Right now you could come to my apartment and smells those smells coming in my window. Now I don't know the exact cause or source but this smell is awful and very strong. I have requested someone to come to my apartment to smell what's coming in my window when there is an awful smell coming in my window. That smell us extremely unpleasant. People keep claiming the wind doesn't blow West but I have screenshots as proof that the wind here definitely comes from the East which means it's blowing West from the East. I love West if the waste pond. It's either that pond or something else near by like the mulch around the bushes. You all can come out and check around the bushes and the mulch to see if that's it? Is there a device to use to see if smells or vapors are bad? These are questions. I just know I love having my window open and a fan in it and being outside and I can't do either of those things because the smell at times is horrible. I have now sent 2 screenshots which 1 tells the air is coming from the East and the other shows the wind coming from the East.						
Conclusions:		on-site visit No violations of the Missouri Odor Rule were observed at the time of the investigation.

59341	9/12/2024	9/13/2024	Benton Park West Neighborhood	Odor	St. Louis /St. Louis City	SLRO	RB	
Concerned Party:		Anonymous						
Concern Info:		Anonymous caller wanted to submit an odor concern for the Benton Park West Area. The odor is a repeat issue that occurs year round, but has been particularly bad this week and this morning (9/12/24). The odor can be smelt from 3200 Nebraska Ave St. Louis, MO 63118. The odor was stated to increase in severity the closer one goes east toward the Mississippi River. The odor was described as Sewer, rancid, and gas. I confirmed that the gas was not a natural gas smell. Potential suspected sources mentioned were Anheuser-Busch, a nearby Valvoline, and a nearby operation replacing of lateral piping.						
		I explained to the CP that to receive updates on the concern to please call our office back and ask to speak with the department member on air & land phones. I also explained how odor investigations are conducted.						

Conclusions: I visited the area two times and i was not able to find a foul odor.

59381	9/10/2024	9/11/2024	Laura Atchison	Open Burning	Kirksville /Adair	NERO	DB	
Concerned Party:		Sherry Eisenmann						
Concern Info:		The caller reports that Laura Atchison, who lives in Kirksville at an unknown address, hired someone on Saturday to tear down a double wide mobile home on her property off Highway 3 east and south of Kirksville. The demolition was last Saturday and they started burning a small pile of the debris. It is still smoldering today and causing breathing issues for multiple neighbors in the area. The caller said that someone was hired with some equipment to come out and demolish the trailer. There is believed to be a large pile of demolition waste left to burn on the property.						
Conclusions:		At site, I found nobody present. I observed a demolished mobile home and I saw that a separate debris pile near the tree line was smoking. I noted a narrow oil stain near the mailbox like a vehicle had a leak while moving. I attempted to call the owner, but there was no answer and the mailbox was full so I was unable to leave a message.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59382	9/6/2024	9/11/2024	Unknown	Open Burning	Kirksville /Adair	NERO	DB

59383	9/12/2024	9/18/2024	Sawmill	Open Burning	Spickard /Grundy	NERO	DB	
Concerned Party:		Anonymous						
Concern Info:		Caller reports that an Amish sawmill west of Spickard is burning sawdust 24/7/365, causing nuisance smoke. States the sawmill began operation 10 or so years ago and for the last few years has been receiving multiple semi loads of logs almost daily. Owner may or may not be named Stutzman.						
Conclusions:		At the site, I observed a large pile of wood waste being burned. I spoke with Jonas Stutzman, the sawmill owner, and discussed the concern. He said his sawmill produces about 8,000 board feet per day. I informed him that the Missouri open burning rule has restrictions that apply to sawmills of that size and larger, including 200 yard setback distance and to only burn during the day. He said sawdust doesn't extinguish easily and they can't put it out at night. I recommended they burn smaller piles or find alternative means of disposal. I provided a fact sheet and a copy of the open burning rule. On returning to the office, I measured the distance from the burn pile to buildings on other properties using Google Maps and found it was about 200 yards.

59388	9/9/2024	9/11/2024	1636 Rahmier Road	Open Burning Open Dumps	/Lincoln	SLRO	LZ	
Concerned Party:		Anonymous						
Concern Info:		<p>Recieved an open burning concern from the DNR website. The CP states "Giant piles of trash being burnt and then buried. Was hearing alot of noise and tractor sounds so With my drone I flew over properties surrounding mine and seen located across the feild several piles of tires, meta, furniturel and trash. There was a man approximately his mid 30s adding to a pile that is approximately 15 to 20 ft tall. Later that night I went out to walk the dog could smell a strange smell the power was smeltering and had been burnt then a few months later heard the big machine again so investigated and seen him burying it under the ground. This has continued and currently He is building another pile didn't think much of it until recently when my water started tasting funny. Could someone please check this out.</p> <p>When you're on the driveway located behind what seems to be an earthen type house and a shed before you get to the warehouse building Outback by a greenhouse frame. You can't miss it it's huge gigantic this time seems to be a lot of wood but under it is where he's buried all in that area several piles through the last few years since I noticed. Apologize for not reporting before now"</p>						
Conclusions:		I conducted a site visit and spoke to the owner. A complince assisitance letter with open burning fact sheets was issued to the property owners.

59436	8/29/2024	8/29/2024	KJU Construction	Fugitive Particulate Matter	Washington /Franklin	SLRO	MC	
Concerned Party:		Dale Volmert						
Concern Info:		Dale Volmert called to complain about a rock quarry that is between two subdivisions and has been causing nuisance dust that covers the roofs of the homes and causes noise. This quarry has supposedly been there for about 3 years. Vale said that he has talked to DNR before, including Miranda Cason, but has not received a satisfactory response in his opinion. He is concerned for his and the locals' health and thinks DNR should be able to do something about it. He knows they received a 12-month permit, but believes they are violating it because they have been in operation for much longer than that.						
Conclusions:		No violations were noted at wither site visit. The CP(s) were told to contact SLRO if dust continues to leave the property boundary, or other concerns arise. I will speak with the water unit about the creek concerns and provide the CP information on Public Corruption and Fraud Division with the Office of Missouri State Auditor to do with what they see fit.
